\$ HAPPY/SAD DOLLARS \$

- Bill Stuart had a great two week visit from their daughter and grandchildre, who now live in Sweden. It was a great get together!
- Alberta Craft's grandson is now a professional engineer as well as having a finance degree. His briother is a chartered accountant.

Special Guests

André Dugas introduced graphologist, (handwriting analyst) **Elaine Charal**, who shared the secrets within our handwriting.

Your personality is mirrored in your handwriting. Understanding its meanings gives us insight when hiring, choosing a partner or just as a source of fun! Elaine will do individual analysis at parties. She analyzed several handwriting samples offered by our members. Her descriptions seemed quite accurate!

Comparing two very different handwriting styles with the qualities needed for a particular job gave us an idea about what to look for when judging handwriting. Some specific examples include circled signature means a closed person; hooks at the beginning of strokes means acquisition; and large capitals means a big ego. Handwriting can change over time. In the early days Richard Nixon's signature was legible and near the end of his presidency it was an illegible scrawl.

Frank Sgarlata thanked Elaine for an entertaining presentation.
